

# Test Browser Compatibility

## Approach:

I will test the Takealot website on popular browsers to ensure consistent functionality, layout, and user experience.

## Browsers Tested (Desktop):

- Google Chrome (Latest Version)
- Mozilla Firefox (Latest Version)
- Microsoft Edge (Latest Version)

- Safari (macOS)

## Test Scenarios Covered:

- Homepage loading
- Navigation menu functionality
- Product search and filters
- Product page display
- Add to cart
- Checkout process

- Payment page display
- Order confirmation page

## **Browser Compatibility Test Results:**

## **Summary of Browser Testing:**

**Passed in all major  
browsers.**

## **Minor Observations:**

- Edge: Slight delay in loading high-resolution banner images — could be optimized for performance.
- Safari: Minor font rendering difference — acceptable, as it doesn't affect readability or usability.
