

Verify Core Functionality of Takealot

Approach:

I'll create basic test scenarios and verify the expected behavior of Takealot's core features like:

- User Registration / Login
- Product Search
- Adding to Cart
- Checkout Process
- Payment Page
- Order Confirmation

Functional Test Scenarios

Observations:

- Core functionality is stable.
- All major flows worked as expected.
- Basic form validation is present across login, registration, and checkout.
- Shopping cart updates in real-time.
- Payment gateway shows standard validation checks.

Minor Functional Improvement Suggestions:

- Improve field highlighting during validation errors on the checkout page.

- Enhance product search relevance for some categories.
