Test Device Compatibility (Mobile & Tablet)

Approach:

I tested the Takealot website on different devices to ensure responsive design, usability, and functionality across screen sizes.

Devices Used:

- Android Phone (Chrome Browser)

- iPhone (Safari Browser)

- Android Tablet (Chrome Browser)

- iPad (Safari Browser)

Test Scenarios Covered:

- Homepage display & responsiveness

- Navigation menu (burger menu on mobile)

- Product search and filter usage

- Product page layout

- Add to cart functionality

- Checkout process

- Payment page

- Order confirmation

Device Compatibility Test Results:

General Observations:

- Responsive Design: Layout adjusts properly on all devices.

- Touch Controls: Buttons and clickable areas are easily

tappable.

- Navigation: Hamburger menu works without issues.

- Performance: Pages load quickly on both Wi-Fi and mobile data.

- No overlapping text or broken images detected.

Suggestions for Improvement:

- Optimize banner image sizes for faster loading on mobile networks.

- Slight padding adjustment for better alignment on iPad product pages.
