Summarize Findings & Recommendations

Overall Summary of Testing Activities:

As a manual tester, I executed the test plan for the Takealot e-commerce website. Testing included:

- Exploratory Testing

- Core Functionality Verification

- Detailed Feature Testing (Cart,

Checkout, Payment, Order Confirmation)

- Browser Compatibility Testing

- Device Compatibility Testing

Test Results Overview:

Key Observations:

Strengths:

- Smooth and consistent user experience across all devices and browsers.

- Responsive design well-implemented.

- Stable checkout and payment flows.

- Form validation and error handling is effective.

- Product search and filter functionality worked as expected.

Recommendations for Improvement:

Final Verdict:

Takealot's website is functionally stable, user-friendly, and performs well across multiple devices and browsers. Minor improvements suggested will further enhance user experience and performance.
